Team,

Below is an update on Harlan County and Lovewell.

- Below is an updated graph showing the storage in **Lovewell**. This morning Kenny informed me that drawdowns should begin to slow over the coming days as many irrigators in the lower district are running out of their 6 inch allocation. The end of the season will be either August 18 or 22.
- **Harlan County** continues to slowly drop due to evaporation and the lack of inflow. Kenny says the Board has taken some heat from irrigators in the upper district for not taking the small amount of water in the reservoir that has been available.

Let me know if you have any questions.

David Barfield
